MARTÍN PACHECO

Full Stack Software Engineer

Lanus, Argentina | martinlpacheco@gmail.com | linkedin.com/in/martinlpacheco | github.com/martinlpc | martin-pacheco.vercel.app

PROFESSIONAL SUMMARY

I am a Full Stack Software Engineer with over 10 years of experience designing and developing end-to-end software solutions, specializing in Node.js, TypeScript, and React. I focus on solving complex problems with a holistic approach, actively participating across all stages of the software development lifecycle—from requirement analysis and architectural design to implementation, deployment, maintenance, and system evolution.

Throughout my career, I have led and contributed to key projects, taking ownership of core technical decisions. By combining architectural vision, functional analysis, and hands-on development, I build scalable, maintainable solutions tailored to business needs. I thrive in environments where I can drive technical excellence, take ownership, and bring a big-picture perspective to complex systems.

TECHNICAL SKILLS

Languages & Backend: JavaScript, Python, Node.js, Express, Django, REST APIs, JWT.

Frontend & Desktop: React, TypeScript, HTML, CSS, Tailwind, Vite, Electron.

Cloud & Devops: AWS, Terraform, Kubernetes, Docker, GitHub Actions, CI/CD.

Data: PostgreSQL, MongoDB, SQLite, Prisma, Firebase.

PROFESSIONAL EXPERIENCE

ENACOM – National Communications Agency

Software Engineer | Buenos Aires, Argentina *(Jan 2018 – Present)*

- Designed and built the core engine for **“RNI Monitor”** and **“AutoMap RNI”** to process over 10 million non-ionizing radiation data points under the ITU-T K.113 standard, ensuring regulatory compliance across the nation.
- Developed mission-critical desktop applications with Electron, integrating specialized hardware (spectrum analyzers, GPS) for real-time spectrum monitoring.
- Led 100% of architectural decisions, tech stack selection, and database modeling as the sole technical lead, ensuring system maintainability, stability, and continuous evolution.

Software Developer | Buenos Aires, Argentina *(Sep 2010 – Dec 2017)*

- Built internal tools and management software using VB.NET and SQL databases for operational administration, supporting daily inspection, compliance, and enforcement workflows.
- Implemented a ISO 9001-compliant management system for testing laboratories to oversee spectrum analyzers, streamlining evaluation lead times and technical asset auditing.

FREELANCE EXPERIENCE

Oeisis & TaskFlow

- **Designed and developed** modern web platforms using React, TypeScript, Node.js, Astro, Firebase and PostgreSQL.
- **Implemented** secure authentication and authorization schemes leveraging JWT and Role-Based Access Control (RBAC)
- **Configured** automated CI/CD pipelines using **GitHub Actions.**

EDUCATION AND CERTIFICATIONS

- **Information Systems Analyst |** John F. Kennedy Argentine University (2016)
- **Full Stack & Python Developer Certifications** | Coderhouse (2023–2024)

LANGUAGES

- **English:** C2 Proficient (EF SET Certified)
- **Spanish:** Native
